

***FLEXIBILITY FOR PRECAST
CONSTRUCTIONS***

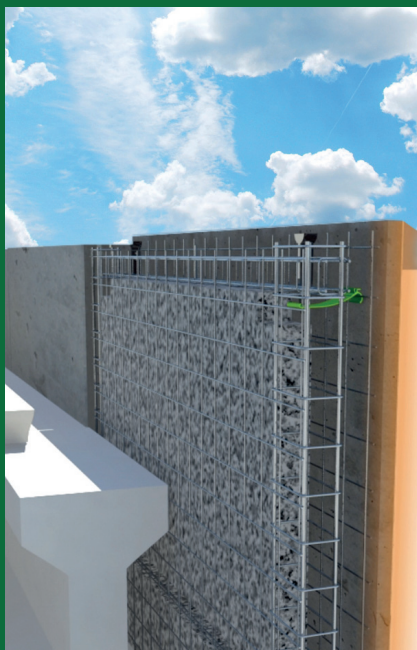

flexbox

***INNOVATIVE
SOLUTIONS,
MATERIALS
AND CONSULTING
FOR PRECAST
CONSTRUCTIONS.***

FLEXCOMP IS AN ESTABLISHED FIRM,
COMPRISING OF SENIOR MANAGEMENT
WITH SIGNIFICANT COLLECTIVE
EXPERIENCE AND EXPERTISE BRINGING
ABOUT INNOVATION
AND CUTTING EDGE TECHNOLOGY IN
THE WORLD OF CONCRETE PRECAST
CONSTRUCTIONS.

FLEXCOMP'S TEAM IS ALSO COMPOSED
OF BUSINESS DEVELOPMENT EXPERTS,
CIVIL ENGINEERS, DESIGNERS
AND INFORMATION TECHNOLOGY
SPECIALISTS.

THANKS TO OUR DIVERSE AND
COMPLEMENTARY COMPETENCIES,
WE OFFER A WIDE RANGE
OF PRODUCTS AND SERVICES, SUCH AS:

GREENFLEX

the original patent flexible connection system for
precast insulated panels.

FLEXWARE

the innovative software to optimize the technical
design of precast insulated panels.

FLEXFORM

form liners for architectural concrete.

FLEXSERV

the Flexcomp division composed
by technical expertise for industrialization
of precast production and design.

*INNOVATIVE,
RELIABLE,
PATENTED*

GREENFLEX

is an innovative connection system that enhance the global performance of precast insulated sandwich panels.

GREENFLEX

is made of a thermosetting vinyl resin reinforced with different types of glass fibers.

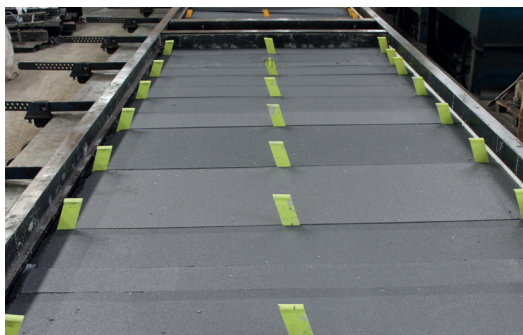

GREENFLEX

can be used for any type of precast sandwich panel: insulated, ventilated, lightweight and fire resistant application, horizontal or vertical panels with and without door/window openings and entrance doors.

GREENFLEX

connectors also excellently performing in high and low temperatures.

GREENFLEX is an internationally patented product that is part of construction system.

FLEXWARE

is an innovative software designed to calculate the expected thermal properties according to the quality of the insulating material utilized.

FLEXWARE

enables to reach the best ratio between cost and thermal performance compromise.

FLEXWARE

makes the calculation easier to engineers in panel insert positioning.

FLEXWARE

is easy to set and operate.

FLEXWARE

is supplied together with GREENFLEX to optimize the design of the panels.

FLEXFORM

FLEXFORM

is composed by a wide range of form liners.

FLEXFORM

allows you to create patterns on exposed concrete walls.

FLEXFORM

adapts buildings to meet all aesthetic needs.

FLEXFORM

obtains even surfaces in a simple and cost-effective manner.

FLEXFORM

is easy to place and remove.

FLEXSERV

means comprehensive technical assistance.

FLEXSERV

performs check up of the production site.

FLEXSERV

permits you to analyze and optimize the industrialized process.

FLEXSERV

improves your on site productivity.

FLEXSERV

assists your designers and production team in project and manufacturing.
